

Connectivity Systems

HIGH SPEED, GLOBAL INFLIGHT INTERNET

Global Eagle Entertainment's connectivity platform, Airconnect Global, is currently available on more than 720+ aircraft. Every minute, somewhere in the world, a GEE equipped airplane is in flight, serving more than 26 million passengers annually. As one of the world's leading providers of content, connectivity and digital media solutions to the travel industry, GEE offers a satellite-based inflight entertainment and connectivity solution that provides a cost effective, high performance IFEC choice for any airline, of any size, anywhere in the world.

ONE SOURCE, ONE COMPLETE SOLUTION

Our unique platform provides airlines with a single resource for global connectivity, the latest sought-after content and rich digital media solutions that entertain and engage passengers, while at the same time giving airlines the opportunity to differentiate and monetize their IFEC offering.

MANAGEMENT

Expertise managing large programs with more than 200 airline customers worldwide

STC CERTIFICATIONS

Experience clearing regulatory milestones through FAA compliancy

Connectivity Systems

BUILD BRAND AFFINITY THROUGH OUR CUSTOM PORTAL

GEE's flexible IFEC platform promotes 'Best in Class' inflight entertainment experiences through its customizable portal, Airtime. Adaptable, programmable, and consistent, Airtime connects via any mobile device, laptop or tablet, through iOS and Android platforms, and becomes the central platform for delivering a compelling inflight experience; further building brand loyalty for your airline.

We deliver an optimal solution to meet any airline need. Where inflight connectivity is not necessary or financially feasible, a non-connected portal is available to deliver a comprehensive and compelling selection of entertainment assets that can earn incremental revenue.

- A highly customizable, scalable IFEC portal = specialized inflight experience, direct to passengers' own devices
- Entertainment content specific to airlines geographic region, made possible through our partners throughout the globe (Hollywood, Bollywood, Asia, Latin, European markets)
- Option of content on-demand stored on-board, which can be easily upgraded to a fully connected internet-based solution
- IFE industry's most robust reporting server to provide insight into customer trends, business performance and system health
- Easy, user-friendly navigation
- Translatable into 30+ languages
- Gate-to-gate service (an industry first, and currently exclusive)
- Internet access, IPTV television, e-commerce, and content on demand
- A wireless IFE solution with DRM protection functioning in both connected and unconnected environments
- Ability to optimize the user experience by managing satellite bandwidth via the GEE Intelligent Traffic Prioritization Engine (ITP)
- Feature-rich interface, including a TV guide and external navigation bar
- Promotes airline differentiation, personalization, and brand extension
- Individually curated movies, TV episodes (including live TV), games, ecommerce & other WiFi enabled services. GEE holds the world's largest market share of international IFE content
- Maximize revenue per boarded guest through multiple, evolving incremental revenue streams
- Connect via any laptop, tablet, or mobile device, both iOS and Android platforms
- Opportunities for additional revenues through advertising and sponsorship arrangements
